Denon's Globe Cruiser AH-W200 In-Ear Headphones have been designed for the frequent business traveller and provide exceptional sound quality, Bluetooth® 3.0 wireless connectivity and integrated controls and microphone for a peaceful yet productive travel experience. Featuring an integrated amplifier, aptX decoding for CD quality audio over a wireless Bluetooth connection. The AH-W200s have a multitude of ear tips to choose from for superior noise isolation, and the ergonomic design of the Globe Cruiser headphones allows you to move effortlessly throughout an airport or busy train station.

SOUNDS LIKE YOU

Eliminate external noise with a choice of bespoke noise isolating ear tips

Business professionals know that with all of the distractions one can encounter when travelling it's tough to keep focused. Block out external noise and enhance the audio performance with a wide choice of comfortable ear tips that achieve a custom fit. Try the Comply™ Foam TX-400M ear tips (which conform to the size of your ear canal) or the right size of silicon ear tips (S, M, L included).

Exceptional sound so you can feel the music like never before

Denon recently celebrated 100 years in the hi-fi industry, and such an amazing audio pedigree is clear from the moment you hear the AH-W200s. We know great-sounding music can be the best remedy for even the most hectic day of travel, and all Denon Globe Cruiser Headphones have been professionally tuned to provide the purest acoustics no matter what genre of music you listen to. Put on a pair of Globe Cruiser Headphones, select favourite song and indulge your passion for great music. The Globe Cruiser AH-W200 In-Ear Headphones have an integrated amplifier to provide superior performance and feature a five hour rechargeable battery.

DENON TRAVEL APP

- Denon Travel App, available for iPhone, iPad, or Android phones enhances the listening experience of the frequent traveller
- Allows you to load frequently-used travel apps for easy access
- Better quality audio player with instant playlist creation capability
- Ability to create, save and share custom EQ curves
- Choose a myriad of EQ presets
- Update your Facebook or Twitter status about the music you like with the touch of a button

FITS LIKE YOU

So comfortable, you may forget you're wearing them

We know a great pair of headphones is about sound and function, but we feel that it is also about fit. In a quest to provide the most comfortable, best fitting travel headphones, Denon's engineers have studied over 4,000 pairs of ears from people around the world, to come up with a design that automatically accounts for the subtle differences in ear shape, placement, ear canal size, and head size. We know that fit and comfort comes from paying attention to the smallest details. The Globe Cruiser AH-W200 In-Ear Headphones are design to fit comfortably with perfectly balanced electronics and a flexible neckband so the headphones don't get in your way while you sleep on the plane.

MOVES LIKE YOU

Wireless, so you can move swiftly through the busiest airport or station

Tired of your traditional wired travel headphones restricting your movement? Denon's Globe Cruiser range of headphones include wireless Bluetooth® 3.0 connectivity models, so you can navigate through busy terminals and train stations without a tangle of wires slowing you down. Better still, Denon's Globe Cruiser Headphones include both aptX and AAC decoding to provide CD quality sound over the Bluetooth wireless connection.

Wired capability, for when wireless is not permitted

Your enjoyment of music doesn't have to stop when you board the plane and the flight attendant tells you to turn off all wireless devices. The Denon Globe Cruiser™ AH-W200 In-Ear Headphones feature a detachable audio cable connection, located under the right ear cup, to plug directly into any audio device.

Integrated wireless controls and microphones, so you can keep your smartphone in your pocket, purse or briefcase

To make wireless audio even more convenient, we've incorporated wireless control of your smart phone on the earpieces. Press the button on the right earpiece to play/pause the music, and the button on the left earpiece to answer a telephone call or conclude it. Adjust the volume using the +/- buttons on the top of the right earpiece. Meanwhile, the Denon Globe Cruiser™ In-Ear Headphones also feature microphones for mobile hands free calling.
