Premium Sound

Designed for those who demand the very best sound whether travelling or at work. The Denon-exclusive FreeEdge drivers in the AH-GC25NC headphones deliver immersive sound. Crisp highs, deep bass and detailed imaging ensure superior sound for your music, entertainment and phone calls.

New FreeEdge Driver for Superior Sound

Denon-exclusive FreeEdge driver design, usually reserved for ultra-premium headphones, cancels out unwanted resonances to provide detailed, accurate sound. Soft, pliant surround materials allow the drivers to deliver crisp highs, deep bass and precise imaging without flexing or distorting the music signal, ensuring the best possible acoustic experience.

Next-Generation Noise Cancellation

The Denon next-generation proprietary active noise cancelling system utilizes dual microphones on each earcup and three noise cancellation modes designed for air travel, commuting and the office. Each mode is specifically designed to reduce or eliminate ambient noise found in your environment. Listen to music, make calls, watch movies and concentrate on your work, free from distracting noise.

New Ambient Monitor

Tap to listen. Hear the flight attendant's announcements or quick in-office conversation with the built-in ambient monitor. Simply tap the AH-GC25NC earcup and the built-in microphone ensures you hear the outside world.

Amazing Battery Life

Enjoy up to 40 hours of noise cancellation. The included USB Micro-B cable lets you charge the lithium-ion battery from any USB charger or computer USB port. Reach a full battery recharge in just two hours. Even if the battery is depleted, take calls and listen to your music with the included 3.5mm audio cable. The battery is only used when noise cancellation is powered on.

Auto Standby

Never forget to turn off your headphones. Save your battery. Set headphones to turn-off automatically due to inactivity.

Calling on the Go

Even in the loudest places, hear every word of your phone call. Use the included cable with in-line remote for outgoing/incoming phone calls, while adding to the exceptional noise cancellation performance.

Designed for Extended Wear

Ideal for frequent air travel and long commutes with a soft, adjustable headband, and dual-movement memory foam earcups ensure a perfect fit and hours of comfort that's never fatiguing.

Full Accessory Kit Included

Lightweight and foldable, the AH-GC25NC is designed for those on the go. Included is a deluxe carrying case for the headphones and accessories, a USB Micro-B cable to charge the lithium-ion battery from any USB charger or computer USB port, and an audio cable with built-in inline microphone and remote for wired listening.

Denon Audio App

The free smartphone app is the perfect complement to the AH-GC25NC, giving you fingertip control with a range of functions. Available for iOS and Android™.
