

AH-C710

In-Ear Headphones

DENON

Acoustic Luxury

Featuring Denon's latest in-ear headphone technologies, the AH-C710 provides superb fidelity and supreme comfort. Combining Denon's exclusive Acoustic Optimizer technology along with our new Radial Cascade Damper system, the AH-C710 provides realistic and lifelike sound with the utmost in listening comfort.

Features

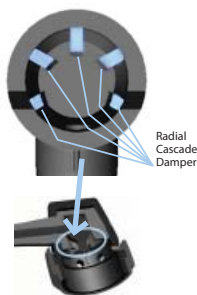

Key Features

- Radial Cascade Damper reduces cable-transmitted vibration noise
- Acoustic Optimizer
Denon's unique Acoustic Optimizer technology achieves optimum acoustic characteristics by adjusting the sound pressure balance in front of and behind the diaphragm. It minimizes muffling in the low frequency range, reduces modulation effects in the mid to high frequency ranges, and achieves a smooth, natural tonal response.
- Ergonomic design for best quality fit and increased comfort
- Hybrid material driver housing (elastomer + machined solid aluminium) for highest fidelity sound reproduction
- Moldable soft foam ear-pieces
The moldable soft foam ear-pieces feature high-tech viscoelastic polyurethane foam technology, which allows the ear-piece to rest where it should be - in the ear canal. It sends the pure music to the ear canal - for solid, defined bass response while at the same time sealing out unwanted noise. The foam ear-pieces are 30 times softer than silicon ones. They literally go unnoticed when placed in the ear and all you're left with is a clear and crisp sound. The moldable foam forms to the dynamic shape of the ear canal so that even while moving around, they remain comfortably in place.

Other Features

- Dynamic sound from 11.5mm Neodymium magnet drive units
- Canal-type in-ear headphone reduces external noise
- Special carrying case with cable management
- Cable clip
- 0.7m Oxygen Free Copper cable with straight aluminium plug housing
- Extension cable: 0.8m with L-type plug
- Comes also with silicon ear pads in 3 sizes (S/M/L)
- Gold-plated stereo mini-jack
- Fully compatible with the original iPhone without an adaptor

Carrying case

Main Specifications

Type	Dynamic type
Drive units	Ø 11.5 mm
Input Impedance	16 ohms
Sensitivity	110 dB/mW
Maximum Input	250 mW
Frequency Response	5 - 25,000 Hz
Weight	5.6 g (not including cable)
Cable Length	0.7 m Oxygen Free Copper cable
Plug	ø 3.5 mm gold-plated stereo mini plug
Accessories	Carrying case x 1, Extension cable x 1 (Cable length: Approx. 0.8m), Cable clip x 1, Ear pieces (S/L size) x 1 (2 pcs/1 size), Foam ear pieces x 2
