

Seamlessly Upgrade to Next-Gen 8K Performance

HDMI 8K Upgrade Kit AVR-X8500H

Your Denon AVR-X8500H delivers the most cutting-edge home theater audio technology to date. You can now easily upgrade it to the latest in HDMI specifications and experience 8K/60Hz or 4K/120Hz picture quality, enhanced gaming capabilities, and the latest in features and content. Just follow the steps below—and be ready to be blown away by your 8K upgrade.

1

Purchase your 8K HDMI upgrade on our website.

4

Within **72 hours** of receiving your package, our audio partners at United Radio will **upgrade your receiver** and ship it back to you.

2

Within a few days, you'll **receive a box** for shipping your AVR-X8500H to our service center.

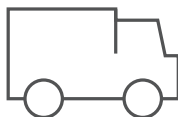

5

Look for the "A" sticker that confirms your upgrade, showing your AVR is ready for ultra-HD 8K content.

3

Securely pack and ship your receiver using the box and its shipping label.

6

Enjoy premium movie and gaming experiences with the detailed sound that defines Denon.
