Remote Monitoring Capability

In today's custom install environment, it's critical for integrators to provide quick, reliable assistance and service to their clients, even after the install is complete. To support this effort, the Denon IN-Command series AVR-X2500H AV receiver features “iInji Invision” remote system management technology and “Domotz Pro” remote monitoring and management technology. These programs allow custom integrators to monitor the status of connected products and troubleshoot remotely from the office or on the go, radically reducing the time it takes to address the issue.

High-resolution Audio Decoding

Discover the incredible fidelity of high-resolution audio tracks and enjoy music as the artist intended. The AVR-X2500H has the ability to decode multiple lossless file types, including ALAC, FLAC, WAV (up to 24-bit/196-kHz) as well as DSD 2.8MHz and 5.6MHz tracks (the audiophile format of SACD). Listen to high-resolution audio through network connected devices like your PC or NAS, or from a USB connected device.

DSP Power Processing

Incredible power for your music and movie needs. The AVR-X2500H includes an advanced DSP (Digital Sound Processor) chip for tremendous power processing. With four 300MHz DSP cores that are capable of processing over one billion computations per second, the AVR-X2500H supports the latest video, sound and processing needs.
